

New! To Enhance Your **Raceclock™** Operation

Introducing The *Raceclock Wireless Grip Switch System*

- Plug-and-Play replacement of the “wired” Start/Stop PB600 Push-Button by Electro-Numerics.
- Receiver unit plugs into the Raceclock’s remote control port.
- Works with both LED (XL-Series) and Flip-digit (LM-Series) Raceclocks.
 - Can trigger any number of Raceclocks at the same time – and/or Time Machines.
 - Up to 10 Wireless Grip Switches can be used per Receiver.
- User programmable Receiver Unit provides two different modes of operation:
 - Mode 1 - Performs Start, Stop and Clear operations for one or more Raceclocks.
 - Mode 2 - Performs Start, Enter Splits, Stop, Recall Splits and Clear operations.
- Wireless connectivity up to 500 ft or more depending on obstacles.
- Rugged, sealed and waterproof Grip Switches do not require battery replacement.
- Grip Switch’s internal battery typically lasts up to 20 years or for up to 1.6 million button clicks.
- High resolution timing correction logic delivers the same timing accuracy as wired PB600 Button.
- Receiver is compatible other wireless devices:
 - Time Machine “Wireless Raceclock Interface”
 - Wireless Keypad
 - Wireless Gun-Start Transducer

Raceclock Wireless Grip Switch System - Receiver Unit \$195

Raceclock Wireless Grip Switch System - Grip Switch \$65
