

# **New!** To Simplify and Enhance Your Timing Operation

## Introducing The *Wireless Raceclock Interface*

- **Synchronize All Of Your Raceclocks Wirelessly and Automatically using your Time Machine**
  - Works with XL-Series (LED digit) and LM-Series (Flip digit) Raceclocks by Electro-Numerics
  - Synchronize Raceclocks separated by any distance by simply “driving” past them
  - Features “Auto-Sync” mode or “Force-Sync” mode with manual push-button
  - Synchronizes to Time Machine’s internal timeclock within 1/100<sup>th</sup> Second
- **Control one or more Raceclocks using the Time Machine’s keyboard:**
  - Preset, Clear, Start, Stop, Count Up or Count Down Raceclock(s)
- **Display Finish Results from Time Machine on Raceclock(s):**
  - Sequentially displays Finish Place Number then Finish Time
  - Displays 1<sup>st</sup> thru 4<sup>th</sup> Place Results or 1<sup>st</sup> thru 10<sup>th</sup> Place Results in Extended Mode
  - Requires either Finish Results Adapter or modification to Time Machine without the adapter
- **User programmable Receiver Unit with simultaneous “multi-device” assignment capability:**
  - Can assign a **Wireless Time Machine Interface** – to sync/control Raceclocks or display results
  - Can assign a **Wireless Keypad** - to manually control one or more Raceclocks simultaneously
  - Can assign up to 10 **Wireless Grip Switches** – to start/stop/enter splits or display splits
  - Can assign a **Wireless Gun Start** – to automatically start Raceclock with a starting pistol

<b>Wireless Raceclock Interface (Transmitter Unit)</b>	<b>\$175</b>
<b>Finish Results Adapter</b>	<b>\$20</b>
<b>Raceclock Wireless System Receiver</b>	<b>\$195</b>
